

# PA 25

## Automatic Weighing machine

- ▶ User friendly data entry screen and operation.
- ▶ Painted or stainless steel construction.
- ▶ Capable of handling a full range of fruits and vegetables: citrus, onions, potatoes, tomatoes, garlic, Brussels sprouts, peppers, etc...

# DAUMAR

# PA 25

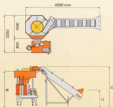

► **Operator friendly:** No manual adjustments are required with the PA-25 as all commands are entered via the keypad, and displayed on the internal liquid crystal screen. As different types of product, and different sizes of packs require various conditions to achieve the optimum performance, the PA-25 can store individual product profiles. These can be recalled by simply entering a number into the keypad. Production data can be obtained on the LCD screen, to enable the packing plant manager to monitor the performance of the weight, ensuring economical performance at speed. The PA-25 also has a self-diagnostic program, which tests all components, and allows engineers to locate problems quickly and efficiently.

Upper view

	Weight	Length	Width	Height
PA-25	500 Kg.	1,800 mm	1,500 mm	2,400 mm
Vertical Elevator	250 Kg.	1,650 mm	1,000 mm	2,815 mm
Long Elevator	250 Kg.	3,900 mm	1,000 mm	3,100 mm

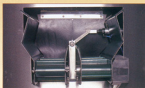

Example of layout with automatic clipping machine Xarpa-01 DT

► **Output:** Depending on the weight of package to be made, the PA-25 can produce from 25 to 40 packages/min.

► **Double exit belt version:** Allows to work simultaneously with two packaging machines, ensuring economical performance at speed (up to 40 bags/min.)

► **Feeding Elevator:** Two different lengths are available: vertical type (1,650 mm) and long type (3,900 mm.) in order to adapt the layout requirements and space available.
